About Assinov Global

Strategic Supplier for the Oil & Gas Industry

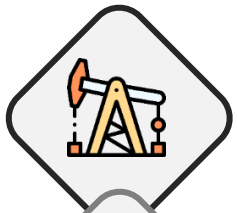

Assinov Global is an international company specialized in procurement and technical solutions for the Oil & Gas industry. Based in the United Arab Emirates, it coordinates a global network of manufacturers and partners.

With its bases in Algeria and China, it ensures smooth, compliant, and traceable supply. Its subsidiary, ASSINOV Algeria, provides local presence for close support.

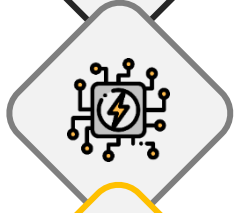

Our Procurement Approach

Covered Segments

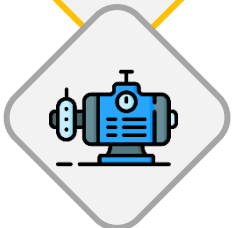

**Drilling & Production
Equipment**

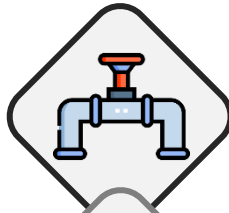

**Instrumentation &
Industrial Automation**

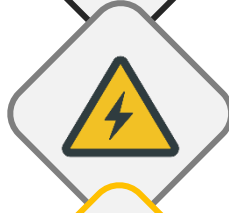

**Online Analyzers &
Shelters**

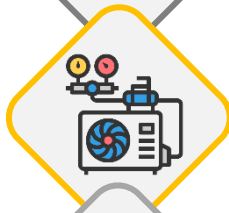

**Pumps, Compressors &
Fluid Engineering**

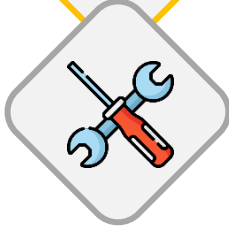

**Piping, Valves &
Fittings**

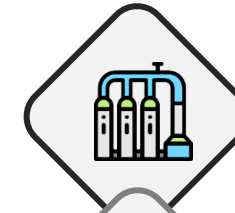

**ATEX Safety & Industrial
Consumables**

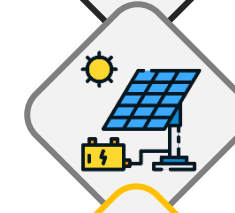

Structures & HVAC

**Maintenance Tools &
Workshop Equipment**

Modular Skid Units

**Renewable Energy &
Solar Systems**

**Personal Protective
Equipment (PPE)**

Drilling & Production Equipment (Upstream)

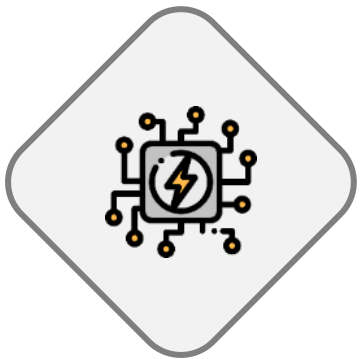

We supply a full range of equipment for oil exploration, drilling, and production, all in compliance with international standards such as API. Our solutions cover both onshore and offshore needs, from the wellhead to surface facilities.

Examples of equipment supplied:

- PDC and tricone drill bits
- Drill pipes
- Wellheads
- Blowout Preventers (BOP)
- Tubing heads and spools
- Completion systems (X-Mas trees)
- Two- and three-phase separators
- Production tanks
- Manifolds and production lines

Key Certified Suppliers.

Instrumentation & Industrial Automation

Assinov Global offers a wide selection of measurement instruments, process sensors, and automation systems (PLC, DCS, SCADA). These solutions are essential for monitoring, controlling, and optimizing Oil & Gas operations.

Examples of equipment supplied:

- Pressure, temperature, level, and flow transmitters
- Flowmeters (mass, electromagnetic, ultrasonic)
- Position and vibration sensors
- Programmable Logic Controllers (PLC)
- DCS and SCADA systems
- Digital recorders and displays
- Human-Machine Interfaces (HMI)
- Automation cabinets
- Industrial wiring and connectors

Key Certified Suppliers.

Online Analyzers & Shelters

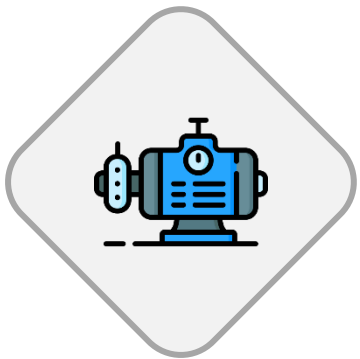

We supply industrial analyzers for gases and liquids, along with prefabricated, climate-controlled shelters to house them. These units ensure regulatory compliance, fluid quality control, and environmental monitoring.

Examples of equipment supplied:

- Gas analyzers (O₂, H₂S, CO₂, CH₄, etc.)
- Liquid analyzers (pH, conductivity, TOC, etc.)
- Online chromatographs
- Dew point detectors
- Prefabricated analyzer shelters
- HVAC for analyzers
- Fire and gas detection systems
- Automatic calibration systems
- Explosion-proof enclosures

Key Certified Suppliers.

Pumps, Compressors & Fluid Engineering

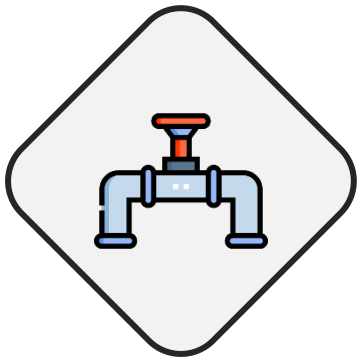

We offer complete solutions for fluid transfer, dosing, circulation, or compression in oilfield installations. These systems are suitable for corrosive, viscous, or explosive liquids.

Examples of equipment supplied:

- Horizontal/vertical centrifugal pumps
- Dosing pumps (diaphragm, piston)
- Positive displacement pumps
- Screw or piston compressors
- Pressure vessels
- Hydraulic systems
- Fluid filtration units
- Relief valves
- Associated piping accessories

Key Certified Suppliers.

Piping, Valves & Fittings

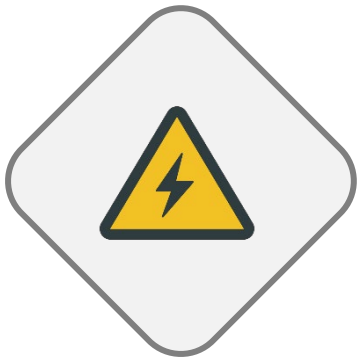

Assinov Global supplies all components required for industrial piping networks: pipes, control or isolation valves, flanges, elbows, and high-pressure fittings. Our equipment is available in various materials (carbon steel, stainless steel, alloys).

Examples of equipment supplied:

- Tubes and pipes
- Manual and automatic valves
- Butterfly, ball, and gate valves
- ANSI/ASME/API flanges
- Threaded, welded, and quick-connect fittings
- Sealing gaskets (spiral wound, RTJ)
- Safety relief valves
- Manifolds (headers)
- Pipe supports

Key Certified Suppliers.

ATEX Safety & Industrial Consumables

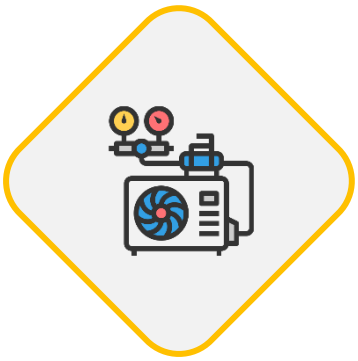

We supply ATEX-certified equipment for explosive zones, as well as essential consumables for operations and maintenance on industrial sites. Special attention is given to HSE compliance.

Examples of equipment supplied:

- ATEX enclosures and lighting
- Fixed and portable gas detectors
- Personal Protective Equipment (PPE)
- Explosion-proof breakers and sockets
- Industrial lubricants and greases
- Filters (air, oil, fuel, particles)
- Gaskets and mechanical seals
- Cleaning and treatment products
- Welding and machining consumables

Key Certified Suppliers.

Structures & HVAC

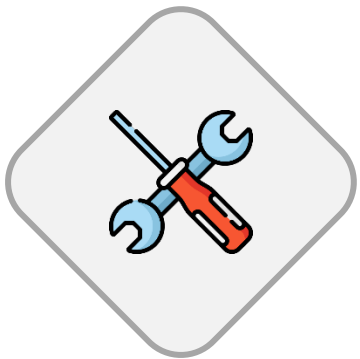

We provide the necessary structures for technical installations: shelters, walkways, steel frames, platforms, and HVAC solutions. These elements ensure mechanical support and thermal comfort for both equipment and personnel.

Examples of equipment supplied:

- Prefabricated shelters (analysis, control, instrumentation)
- Climate-controlled technical containers
- Metal structures (carbon steel or stainless steel)
- Walkways, stairs, and access platforms
- HVAC ventilation and air-conditioning systems
- Industrial extractors
- HVAC filters
- Air diffusers and dampers
- Thermal insulation materials

Key Certified Suppliers.

Maintenance Tools & Workshop Equipment

Assinov Global supplies the tools required for assembly, maintenance, and on-site operations. We also offer spare parts kits and workshop equipment for industrial servicing.

Examples of equipment supplied:

- Hand tools (torque wrenches, sockets, pliers)
- Power tools (drills, grinders, screwdrivers)
- Measuring instruments (multimeters, pressure gauges,...)
- Welding and cutting stations
- Forklifts and hoists
- Preventive maintenance kits
- Seal and wear parts kits
- Workbenches and tool cabinets
- Mobile intervention toolboxes

Key Certified Suppliers.

Modular Skid Units

We design and supply pre-assembled modular skid units, ready for installation. These turnkey systems are custom-built to meet the client's technical specifications and integrate pumping, dosing, instrumentation, filtration, control, and structural frames. Our expertise covers Oil & Gas applications, with manufacturing in compliance with ASME, API, ATEX, or other standards upon request.

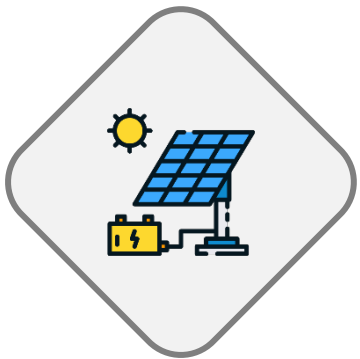

Examples of equipment supplied:

- Chemical injection skids
- Pumping skids (water, fuel, chemicals)
- Metering and measurement skids (fiscal or internal)
- Filtration skids (cartridge, duplex, automatic)
- Air/gas treatment skids (separation, drying)
- Dosing and mixing skids
- Online analysis skids
- Fluid transfer skids
- Custom skids based on client P&IDs

Skids conçus, assemblés et
testés par **Assinov Global**

Key Certified Suppliers.

Renewable Energy & Solar Systems

We provide autonomous or hybrid solar systems tailored to industrial needs in remote sites or for energy efficiency projects. Our solutions cover both energy production and smart energy management, with certified equipment and custom configurations.

Examples of equipment supplied:

- Photovoltaic panels (mono- or polycrystalline)
- Solar inverters (charge controllers, converters)
- Industrial batteries (AGM, gel, lithium)
- Control boxes and supervision interfaces
- Mounting systems (fixed or adjustable metal structures)
- Solar kits for skids, shelters, and remote equipment
- Hybrid systems (PV + generator)
- Autonomous solutions for telemetry, pumping, monitoring, etc.

Key Certified Suppliers.

Personal Protective Equipment (PPE)

We offer a complete range of PPE designed for demanding industrial environments, especially in the Oil & Gas, energy, and construction sectors. All equipment supplied complies with international safety standards (EN, ISO, ANSI, etc.) and is selected for its durability, comfort, and adaptability to field conditions.

Examples of equipment supplied:

- Safety helmets (with or without visor)
- Flame-retardant or antistatic coveralls
- Protective gloves (chemical, thermal, mechanical)
- Safety shoes (S1 to S5 certified)
- Safety goggles and face shields
- Harnesses and lifelines
- High-visibility vests and HSE-compliant clothing
- Additional protective accessories

Key Certified Suppliers.

Certified Compliance

We supply equipment that meets international standards (API, ATEX, IECEx, SIL...) with quality inspection and full documentation.

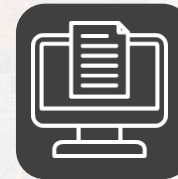

Controlled Procurement

As an authorized distributor of leading brands, we ensure direct, controlled supply in full compliance with industry requirements.

Local Presence

Our strong base in Algeria ensures close follow-up, operational responsiveness, and on-site technical support.

Digital Traceability

Each order comes with complete documentation. An e-procurement platform is being deployed to enhance transparency.

Our Strategic Strengths

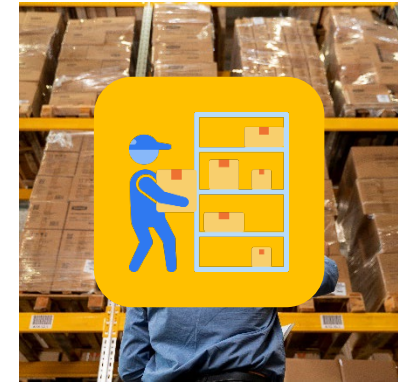

Warehousing

- 2,000 m² in the UAE (Free Zone)
- Logistics hub in China (Shenzhen)

Stocked Products

- 1,200+ active references
- 300 critical items readily available

Responsiveness

- Order preparation within 48 hours to 7 days
- Delivery terms: EXW, FOB, CNF

Operational Capacity & Availability

A Partnership Focused on Performance

Global Reach, Local Commitment

With our international presence, available stock, and network of certified manufacturing partners, we support energy sector stakeholders with rigor and responsiveness. **Assinov Global** is committed to delivering reliable, compliant solutions that meet your operational requirements.

Thanks.

Your Partner for Success
